

---

am a competitive, confident and friendly person. I am reliable when it comes to understanding people's problems and my listening skills help in these situations. I am a good problem solver and am calm and clever when dealing with a confusing situation. I am very ambitious about the future and now I can handle any situation I am put in, confidently, at any given time. I am very dedicated to anything I do and I am persistent to achieve what I have set out to achieve. I know I am a good leader and like to help other people achieve their goals. I know I can pick up new skills easily and effectively and like to persevere until I perfect what I am learning. As well as keeping a close circle of friends, I do enjoy venturing off and meeting different individuals with interesting and unique personalities.

Other than focusing most of my time into my school education, I do have many hobbies that I enjoy and like to participate in. My main interest currently is music, I love to sing and enjoy exploring different genres of music. I enjoy teaching myself how to play new instruments including guitar, cello and piano. This has helped me gain more confidence and has showed me that I can do anything if I put my mind to it. I also love both reading and writing poetry and song writing is also a big part of this. I enjoy making up lyrics and turning them into a song or a poem. I am also very committed to sports and have been most of my life, I mainly enjoy basketball, netball and football. I like to work in a team but also like to put my own personal experience across to try and lead others. I also enjoy both looking at, exploring, and taking my own pictures. Even though I did not take photography for a GCSE I feel that having it as a hobby is good enough for me.

I have received many certificates and trophies both in sport and in school. I have received a certificate for leadership, level one, and am proud to have completed the course successfully. In year nine I was part of the netball team at Chesterton that won the district netball tournament, and came runners up the following year, this was a very proud moment for me. Whilst being involved with sports inside of school I have received many rewards including players and managers player in both a boys and girls football team outside of school. I have volunteered at many different places including a sport's coaching business set up by a family friend. I also helped at Arbury primary school coaching the girl's football team and I worked in a year three class for a day, during work experience. I have also recently been to the USA where I spent three weeks in Connecticut and New York. This was definitely an achievement for me as I was with many people I had never met before and was amongst new culture and environment.

I am very excited about the future and am determined to achieve the personal goals I have set for myself. I want to further my education in college where I hope to achieve A levels in English Language/Literature and Media. These are two subjects I feel could truly benefit me in the future with whatever I decide to do. I am interested in becoming an English teacher and would love to spend my time educating other people in the language and literature of English. As well as this I would love to travel the world to experience other cultures and ways of life. This has been something I have always wanted to do and hope to be able to fulfil this ambition in the future. I will put all of my effort and time into achieving my goals and will work hard to make sure I am successful. This will ensure I have a happy life and stable future ahead of me.
