**Chesterton Community College
e-Safety Policy 2016**

Contents

- The background to this policy
- Rationale
- Teaching and Learning Using Online Technologies
- Technology in School
- The ESafety Curriculum
- Safeguarding Children Online
- Responding to Incidents

Background to the policy

This policy has been created by the e-safety coordinator, in conjunction with the Chesterton e-safety committee, with input from students, staff and governors. The purpose of this policy is to describe the safeguarding measures in place for adults and children in school:

- The ground rules we have developed in school for using the Internet and online technologies
- How these fit into the wider context of our other school policies
- The methods used to protect children from sites containing pornography, racist or politically extreme views and violence.

Ultimately, the responsibility for setting and conveying the standards that children are expected to follow when using technology, media and information resources, is one the school shares with parents and carers. At Chesterton Community College, we feel that the most successful approach lies in a combination of site filtering, of supervision and by fostering a responsible attitude in our pupils in partnership with parents.

Rationale

At Chesterton we believe that the use of information and communication technologies in school brings great benefits. To live, learn and work successfully in an increasingly complex and information-rich society, our children must be able to use technology effectively.

The use of these exciting and innovative technology tools in school and at home has been shown to raise educational standards and promote pupil achievement. Yet at the same time we recognise that the use of these new technologies can put young people at risk within and outside the school. Some of the dangers they may face include:

- Access to illegal, harmful or inappropriate images or other content
- Unauthorised access to / loss of / sharing of personal information
- The risk of being subject to grooming by those with whom they make contact on the internet.
- The risk of being exposed to radical or extremist views.
- The sharing / distribution of personal images without an individual's consent or knowledge
- Inappropriate communication / contact with others, including strangers
- Cyber-bullying
- Access to unsuitable video / internet games
- An inability to evaluate the quality, accuracy and relevance of information on the internet
- Plagiarism and copyright infringement
- Illegal downloading of music or video files
- The potential for excessive use which may impact on the social and emotional development and learning of the young person.

While children and young people need support to keep them safe online, the risks associated with the use of technology are not restricted to just them. E-Safety issues can also affect adults who work or are associated with the school. For example school and personal data being entered on web/social networking sites, fraudulent email traps and cyberbullying. It is impossible to eliminate risk completely. It is therefore essential, through good educational provision to manage the risk and deal with any threat to safety.

Teaching and Learning Using Online Technologies

The internet is a part of everyday life for education, business and social interaction.

Benefits of using online technologies in education include:

- Access to world-wide educational resources
- Facilitating more independent learning
- Allowing new teaching practices to improve learning
- Access to experts who would otherwise be unavailable
- Access to anytime, anywhere learning
- Collaboration across schools, networks of schools and services

When using online technologies, it is essential that children understand how to behave in a safe and responsible manner and also how to react when faced with inappropriate content or situations which make them feel uncomfortable. We believe that a comprehensive programme of e-safety education is vital for developing our pupils' ability to use technologies safely. This is achieved using a combination of discrete and embedded activities drawn from a selection of appropriate materials.

We believe that just as children learn how to swim by going to a swimming pool so they will learn safe life-long online behaviours by accessing and using the internet. Members of staff constantly monitor pupils' use of the internet and other technologies and are able to monitor pupils' use of email communication and other online activity. Our programme for e-safety education is evidenced in teachers' planning either as discrete or embedded activities.

Technology at Chesterton

The school's ICT infrastructure is designed to minimise the risks associated with adult and pupil use of technology. This is provided and maintained by both the Local Authority's Education ICT Service and by Chesterton's ICT department.

Chesterton uses the Lightspeed filtering technology both in the school and at home via college provided devices to provide safe and secure internet filtering for both students and staff.

Chesterton utilises the Securus system that remotely monitors and captures activity on all computers attached to the school network. The system automatically alerts administrators to anything it flags for safeguarding which are dealt with according to our safeguarding procedures.

This helps to ensure that staff and pupils rarely encounter material which is inappropriate or offensive. If / when they do, the school's AUPs and e-safety education programme ensure that they are equipped to deal with any issues in the most appropriate way.

Technologies regularly used by pupils and adult stakeholders include:

Staff:

- Tablets, laptops and desktops
- Cameras and video cameras
- Internet, E-mail, access to SIMS and confidential pupil information

Pupils:

- Tablets, laptops and desktops
- Cameras and video cameras
- e-mail, VLE's, discussion forums, blogs and other communication tools
- Other peripherals such as programmable toys, dataloggers, control technology equipment

Others on school premises:

- Limited access to school systems such as filtered internet access using a visitor login.

All students are issued with individual logins at the beginning of year 7 and continue to use these for various services throughout their time at Chesterton Community College. All members of staff have individual, password protected logins to the school network and visitors to the school can access part of the network using a generic visitor login and password. The school's network can either be accessed using a wired or wireless connection. However, the wireless network is encrypted to the standards advised by the Local Authority and the wireless key is kept securely by the ICT department. Students are **not** permitted to connect personal devices to the school's wireless network and the wireless key is **not** given to visitors to the school.

The eSafety Curriculum

In line with recommendations from Ofsted guidance, September 2015, we have planned a range of age-related teaching and learning opportunities to help our pupils to become safe and responsible users of new technologies. These opportunities include:

- Online safety lesson delivered with provision of tablet learning device
- Online safety lessons in computer studies curriculum
- Termly assemblies
- Specific activities during internet safety day
- Age-related classroom activities using online materials
- Online safety work in PSHE lessons delivered via tutor time
- Regular information sent to students via VLE platforms

Safeguarding Children Online

Our School recognises that different users will be expected to use the school's technology systems in different ways – appropriate to their age or role in school. We acknowledge the need to:

Equip children to deal with exposure to harmful and inappropriate content and contact, and equip parents to help their children deal with these things and parent effectively around incidences of harmful and inappropriate conduct by their children.

UKCCIS (The UK Council for Child Internet Safety) – June 2008

The school has published Acceptable Use Policies for pupils and staff who sign to indicate their acceptance of our AUPs and relevant sanctions which will be applied should rules be broken.

Any known or suspicious online misuse or problem will be reported to the designated eSafety Co-ordinator for investigation/ action/ sanctions.

Responding to Incidents

It is important that all members of staff – teaching and non-teaching – are aware of how to respond if an eSafety incident occurs or they suspect a child is at risk through their use of technology. It is important that responses to eSafety incidents are consistent with responses to other incidents in school. This may mean that serious actions have to be taken in some circumstances.

If an eSafety incident occurs Chesterton Community College will follow its agreed procedures for dealing with incidents including internal sanctions and involvement of parents (for ICT, this may include the deactivation of accounts or restricted access to systems as per the school's AUPs). Where the school suspects that an incident may constitute a Child Protection issue, the usual Child Protection procedures will be followed.

Dealing with Incidents of Online Safety and Seeking Help

If a concern is raised, refer immediately to the designated person for child protection. If that is not possible refer to the headteacher or, if necessary, the Chair of Governors.

It is their responsibility to:

Step 1: Identify who is involved – any combination of child victim, child instigator, staff victim, or staff instigator

Step 2: Establish the kind of activity involved and whether it is illegal or inappropriate. If in doubt they should consult the Education Child Protection Service helpline.

Step 3: Ensure that the incident is documented using the standard child protection incident logging form

Depending on the judgements made at steps 1 and 2 the following actions should be taken:

Staff instigator – follow the standard procedures for Managing Allegations against a member of staff. If unsure seek advice from the Local Authority Designated Officer or Education Officer.

Staff victim – Seek advice from your Human Resources (HR) provider and/or Educational Child Protection Service

Illegal activity involving a child – refer directly to Cambridgeshire Constabulary – 0845 456 4564 – make clear that it is a child protection issue

Inappropriate activity involving a child – follow standard child protection procedures. If unsure seek advice from Education Child Protection Service helpline.

Equally, if the incident involves or leads to an allegation against a member of staff, the school will follow the agreed procedures for dealing with any allegation against a member of staff.
